

TEAMWORK BUILDS SUCCESS.

Buildable – Bankable – Sustainable

*As leaders in our industry, and members of the United States Green Building Council, it just stands to reason that Partners develops facilities that meet the **Leadership in Energy and Environmental Design (LEED) Building Rating System** standards.*

LEED is the nationally accepted benchmark for the design, construction, and operation of high performance green buildings. LEED promotes a whole-building approach to sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection, and indoor environmental quality.

At Partners Development, we are proud to be a part of transforming the way buildings and communities are designed, built and operated.
